

## Why Charter?

There are very few truths in the North American business paradigm, but one truth is that an aircraft is a powerful business tool. This is why almost every major corporation on the continent has access to an owned, fractionally-owned or chartered aircraft.

An aircraft allows you to set up multiple meetings in multiple destinations in a single day, and have you home in time for supper.

Reduce post-trip fatigue and increase post-trip productivity!

## Is Charter Air Service Right For You?

- ❑ You need to be productive. You recognize your time is valuable.
- ❑ You need flexibility. Delays are a nuisance. You don't enjoy waiting.
- ❑ You prefer privacy when you travel.
- ❑ You can visit one or multiple destinations and get a great deal done, all in one day.
- ❑ You prefer to be with your family instead of being on the road. You like to sleep in your own bed.
- ❑ You like to associate yourself with others who have a commitment to excellence.
- ❑ Or... is fractional aircraft ownership or charter card a better value for your business? If so, ask us how!
